ABOUT ME

I'm a CSE undergraduate with a strong interest in frontend engineering and user-focused web development. I have experience building responsive and interactive applications using React, JavaScript, Tailwind CSS, HTML, and CSS. I enjoy creating clean, modern interfaces and continuously improving my skills through hands-on projects and learning new frontend technologies.

SKILLS

Front-End Development: HTML5 , CSS3 , Tailwind CSS , DaisyUI, JavaScript, React.js, Next.js

Programming & Problem Solving : C , C++ , Competitive Programming , Python

Tools & Technologies : Git , GitHub , VS Code

Soft Skills : Team Collaboration , Leadership , Project Coordination , Communication

PROJECT EXPERIENCE

ART-GALLERY WEBSITE

Designed and developed a modern, responsive art gallery website using HTML, CSS, and JavaScript. The project features an elegant user interface, smooth navigation, and a visually appealing layout that enhances the user experience across different devices.

Solar System Explorer

Developed an interactive Computer Graphics project using C++ and OpenGL to simulate the Solar System. Implemented realistic planetary rotation, revolution, and 3D visualization concepts to demonstrate fundamental computer graphics principles.

Eat & Split App

Built an interactive bill-splitting web application using Javascript that allows users to manage shared expenses among friends. The application performs real-time calculations, tracks balances, and provides a simple, user-friendly interface.

Quiz App

Created a responsive quiz application that presents multiple-choice questions, validates answers instantly, and displays the user's score at the end. The project focuses on JavaScript logic, DOM manipulation, and interactive user experience.
